Hotel -->
Police Station

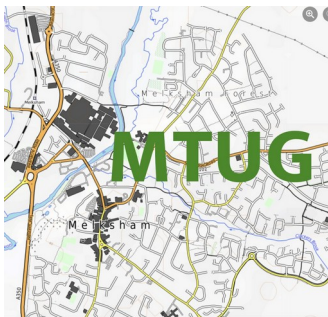

Written for 17th September 2022
route proving and demonstration runs
main route shown in purple

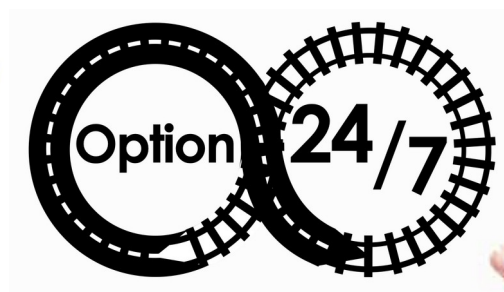

Thank you for coming along today, arranged in association with Melksham Town Council's ClimateFest by Option 24/7 and the Melksham Transport User Group and operated by the Big Lemon (electric) bus company.

Today we are testing out a proposed "route 16" to link the railway station, town centre, residential and business areas with a sustainable service connecting Melksham all day, every day with a service running about once an hour. There is a great deal of further works to do – consultation, financial, planning and operational and hurdles to overcome, but it's all staring to come in line.

Buses will be timed to connect with trains. They will complement rather than compete with other buses in Melksham (new routes for new opportunities) and be fully registered bus services accepting concessionary bus passes and being part of the local enhanced bus partnership under the Bus Service Improvement Plan. Due to infrastructure and delivery issues, initial services may be run with less sustainable vehicles, with a move to electric vehicles and then solar charged operation. This operation is planned in association with other operations in the South West, with other services in Wiltshire, Somerset and WECA.
